

QMG INDUSTRIES SDN BHD

(721341-H)

BOOT CLEANING MACHINE ASC-W203G

Working principle:

- Come with one brush for shoe sole and 2 brush for shoe side.
- Automatic sensor will detect the user and turn on the motor to rotate the brushes to clean the shoe sole and side simultaneously.
- Motor will stop after the preset timing (1 - 60s).

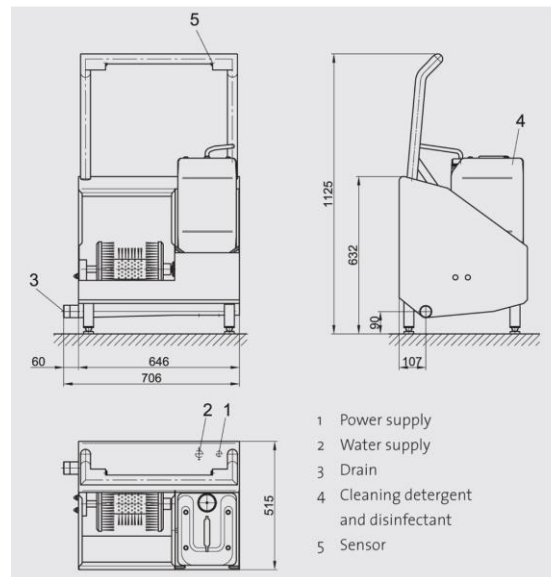

Installation requirement:

- Machine must be installed indoor with flat and smooth floor.
- Water supply and drainage pipe or hose to connect.
- Power supply: 220VAC.

Product Specification:

- 1) Brush – 1 PPT Brush for sole and side of the boot
- 2) Motor – Gear motor
- 3) Motor power: 120W
- 4) Container: 10 Liter
- 5) Spray control – Solenoid valve
- 6) Casing Material – Stainless Steel
- 7) Handle – U Shape
- 8) Start Mode: Sensor (Photo Electric Sensor)
- 9) Timer: Adjustable
- 10) Dimension without handle: 695x515x650 mm(WxDxH)
- 11) Dimension including handle: 695x515x1160 mm (WxDxH)

Made in China
